

Canon Science Papercraft Mini-book

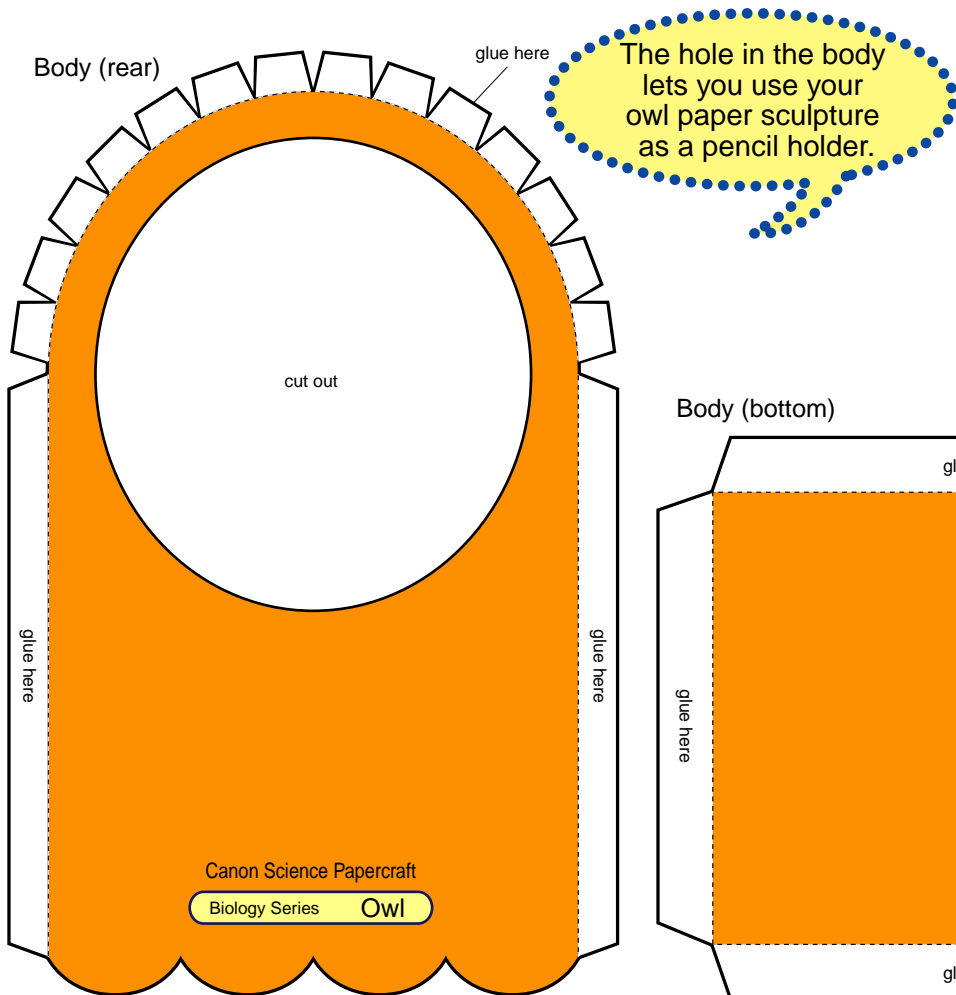

Biology Series

Owl

Unlike other birds, the owl's eyes are on the front of its head. Its face is round, and acts as a parabolic antenna, perfect for helping the nocturnal owl find food. One of the owl's ears is slightly higher than the other. It is believed that this helps it to better know exactly where a sound is coming from.

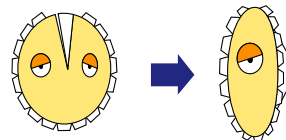

*Cut out the card above and save it. You can collect the cards from each of the Papercraft projects to make your own mini-book!

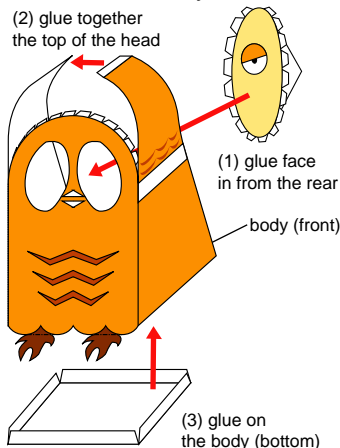

★ Directions

Print out pages 1 and 2, cut out each individual part along their cut lines, and fold along the mountain and valley fold lines.

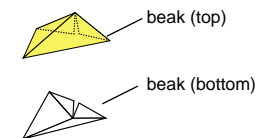

1. Build the face

2. Build the body

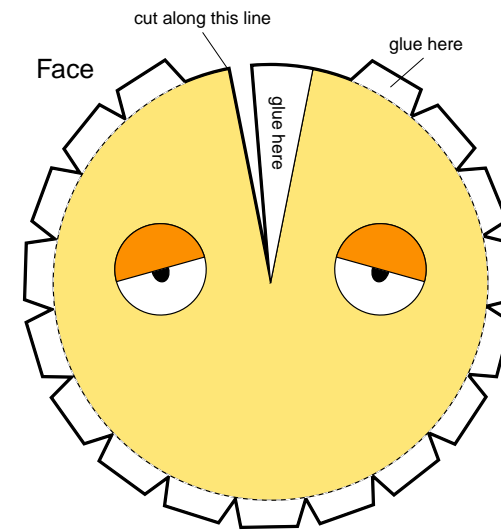

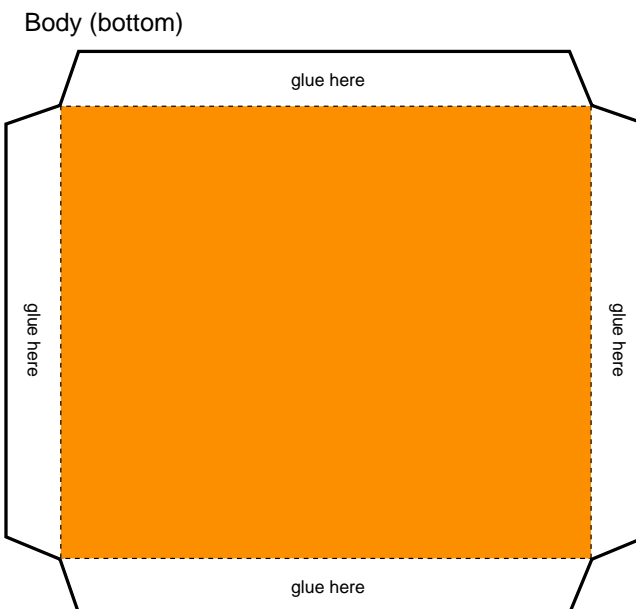

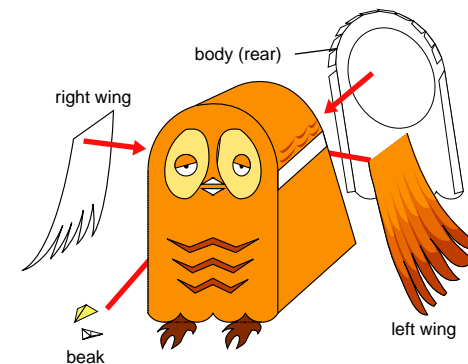

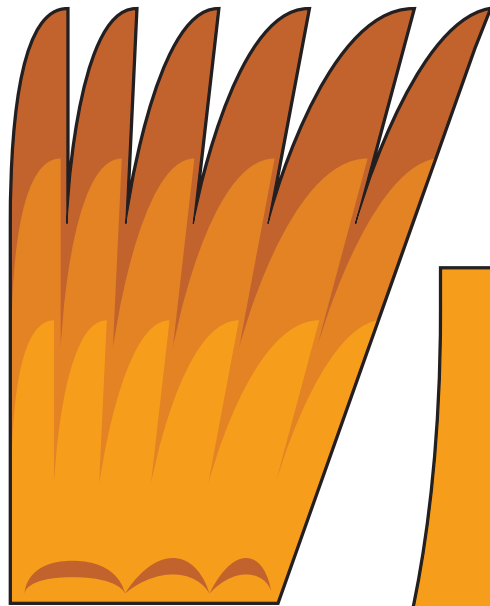

3. Build the beak

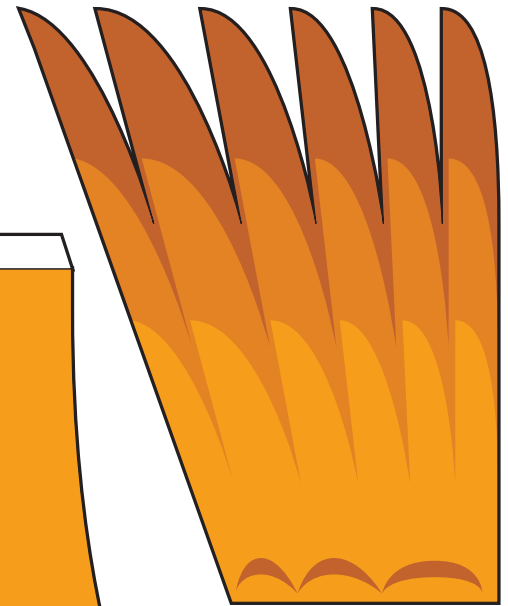

4. Final assembly

Glue all the parts together

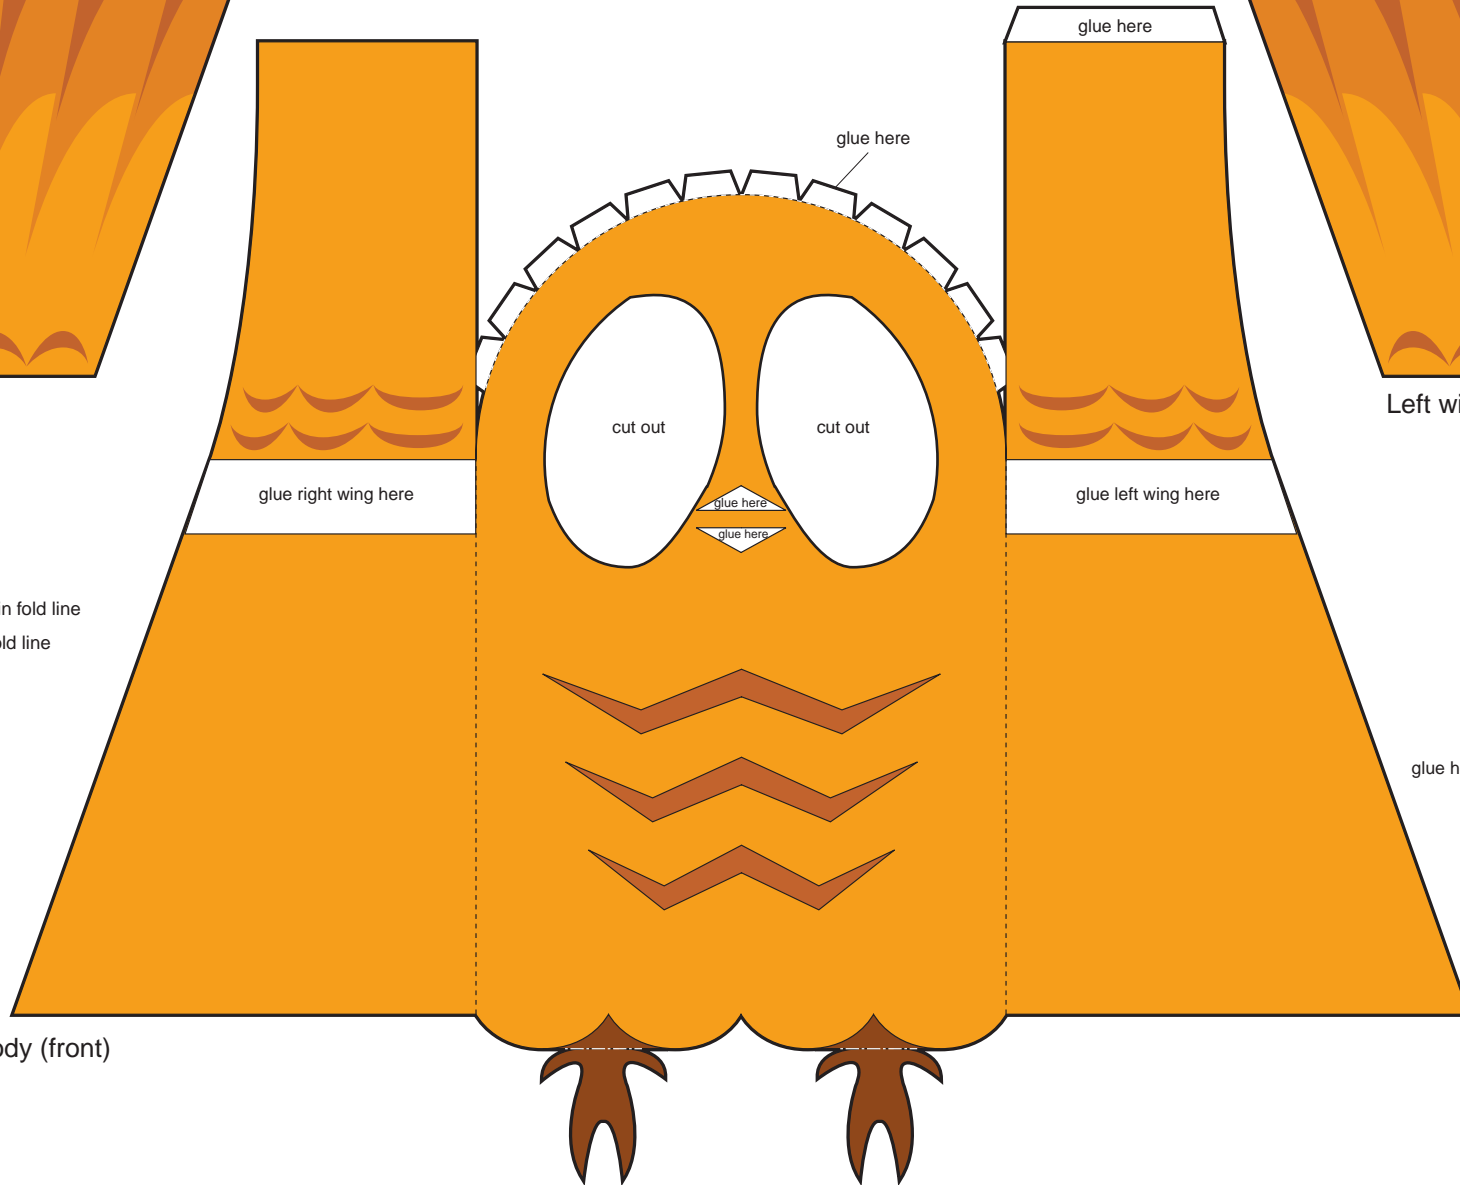

Right wing

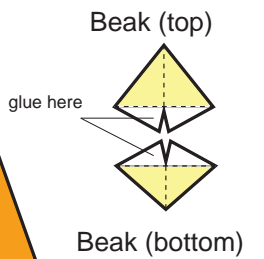

Left wing

- cut line
- - - mountain fold line
- - - valley fold line

Body (front)

Beak (top)

Beak (bottom)
